 **Livingston**
test equipment rental

Rental and Leasing Livingston – part of the Microlease group and Europe’s largest test equipment rental company - is able to provide you with the right instrument for your needs.

For rental periods from as little as one week through to five years, we can offer you great value for money for your project.

With over 40 years’ experience, we have a complete understanding of the testing needs of our customers and the tools they need to perform their jobs. That’s why

we ensure that all our instruments are fully calibrated, maintained and ready-to-use all year round. With a global footprint - and the ability to deliver to over 150 countries - in the unlikely event that an instrument should go wrong, or get broken, we can usually get a replacement to you from your local depot in 24 hours.

48 Channel Datalogger

How Can Rental Benefit Your Business? In challenging economic times, smart managers use rental to keep their business at full speed. There are a variety of reasons for renting from Livingston. Many clients find that when cash is limited or when future demands are unknown, Livingston's rental service offers them the flexibility to have access to the latest technology as and when it is needed.

Below are 10 ways in which Livingston's rental service could help to keep your business stay ahead of the pack in a competitive climate:

1: No hidden costs

All equipment including maintenance, support, administration and logistics are supplied by the rental provider and included in the cost of the rental agreement. This ensures additional costs are kept to a minimum, allowing companies to evaluate and manage their total cost of ownership.

2: No capital expenditure or investment necessary

Rental enables businesses to meet peaks and troughs in business environments. In project down times and in seasonal lows, businesses can return equipment without having committed to capital investment.

3: Wide range of instruments directly available

By using Livingston's rental service, a wide range of top quality instruments and tools are available at your disposal. For each project you can select the best in class instrument. No compromises!

4: Improved Quality

If you rent equipment from Livingston you can be sure that all instruments are well maintained, calibrated, and complete with the right set of accessories. So ready to use.

5: Pay-as-you-go

Rental allows businesses to pay for equipment as they use it and as they get paid by their customers. No up-front investments, no residual value issues, no depreciation costs after your project is finished.

6: Try before you buy

'Try before you buy' is a flexible solution. It ensures that the equipment meets your needs before considering the

cost implications of purchase. In the long-term, try before you buy saves money by ensuring you are using the best instruments for your money.

7: Get the maximum out of your instruments

If you use expensive instruments it is very important to use them in the best possible way. Livingston can help you to select the right instrument and use it in the best possible way.

8: Lead-time bridging

Whilst waiting for delivery of new systems; rental provides bridging to cover the manufacturers lead time..

9: Guaranteed availability

If equipment goes faulty, replacements will usually be supplied within 24 hours , minimising disruption and potential financial loss to your company or projects.

10: Avoid disposal costs liabilities

Current EU legislation on the disposal of Waste Electrical and Electronic Equipment (WEEE) means companies have to dispose of their redundant test equipment responsibly. However, organisations can avoid the disposal, and associated costs, of unused and outdated equipment by renting the latest equipment.

Access to over 57,000 Test Instruments

Choosing Livingston as your test and measurement equipment supplier gives you access to our global reach capabilities, 8,000 product lines and an extensive inventory of over 57,000 instruments ranging from basic temperature measurement instrumentation to the most sophisticated

of high frequency analyzers. All our instruments are supplied with the necessary accessories, manuals and valid calibration (if applicable) ready-to-use.

Check our online catalogue for all available instruments and rental prices:
