Livingston to Host Technical Seminars in Berlin

25th January 2012 - Test equipment sourcing specialist Livingston, is set to host two new seminars in support of its growing German customer base. These will take place in late February, at Justus-von-Liebig-Str. 7, Berlin.

The first event, to be held on Thursday, 23rd February, is organised in association with Anritsu. This will provide attendees with information on the different test and metrology tools required for effective deployment of next generation mobile communication infrastructure. Topics such as antenna installation, measurement methods, measurement theory and antenna positioning (fibre-to-the-site and fibre-to-the-feed) will all be covered, as well as practical demonstrations using Anritsu's latest Site Master able/antenna analyser model.

“These seminars give Livingston the opportunity to address some of the important challenges currently facing both the wireless and wire-line communication sectors,” states Oliver Lanz, Sales Director of Livingston Germany. “They will prove invaluable as an information resource for field engineers, engineering managers and subcontractors who are involved in the roll out of emerging network technologies, allowing performance of newly deployed infrastructure to be maximised.”

About Livingston:

Livingston provides and manages test equipment for companies in more than 100 countries worldwide, giving them access to leading edge products regardless of their budget constraints. Founded over forty years ago, the company has built up a highly experienced team of engineering and supply chain professionals. Its services include rental, calibration management, and inventory management. Partnering with Livingston allows companies to optimise their capital expenditure, bringing greater return on investment, as well as generating cash for unused or underused assets through its equipment disposal and redeployment activities.
